**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Having lived in San Francisco all my life, we have been handicapped with poor internet speeds since we live further away from the closet Central Office. Sonic has come in and introduced Fiber Gigabit internet to most neighborhoods in San Francisco to stay on track with the higher and higher demand of higher speed bandwidth. Sonic offers very fair and competitive pricing and is exactly what want. I have recommended Sonic to several people and they all have enjoyed it ever since they moved. Comcast will price gouge you with decent 1-2 contract rates and then up your monthly service fee without letting you maintain that pricing, you have to practically beg, threaten to leave Comcast, and be lucky enough to talk to the right person to give you a contract with decent rates. Where as Sonic is a set price and offer month-to-month contracts. I realize that Sonic utilizes AT&T infrastructure, but AT&T is a big enough fish in the seas and has plenty of market share. Let's let a local San Francisco Bay Area business thrive among the big fishes in the sea to keep big companies in check and to ensure their pricing remains reasonable.

Thank you for your time,

Hendrick Tran
